#### **DETAILED ACTION**

### Claim Objections

Claim 2 is objected to because of the following informalities: line 4, "it" should be 1. changed to -- the base plate--. Appropriate correction is required.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Russell et al, US Patent No. 4,810,096, cited by the applicant.

Russell et al disclose a plate reader comprising: a rectangular housing (1) having a plate receiving drawer (2) slidably mounted in one end of the housing on rails (3, 4), the drawer having two elongated support rails (5, 6) extending into the housing, and which provide a seating for a conventional 96 well microtitre plate (7); a digital display panel (9) which when the plate reader is in use displays digital values corresponding to the measured absorbancy of the samples contained within the wells of the microtitre plate (7); ON and OFF buttons for the user to switch the plate reader on and off; are two control knobs (10, 11), which serve to move the reading head inside the plate reader into position relative to each of the wells in turn of the microtitre plate; a reading head (19); a light source (23); and a photodetector cell (25) 9see col. 3, line 12+).
